

AIRLINE TRAVEL

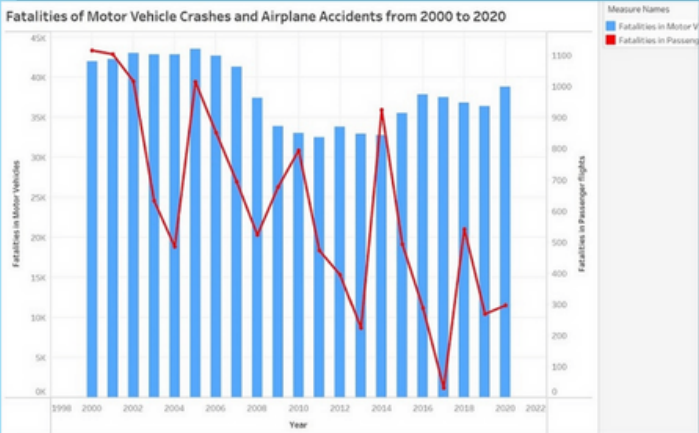

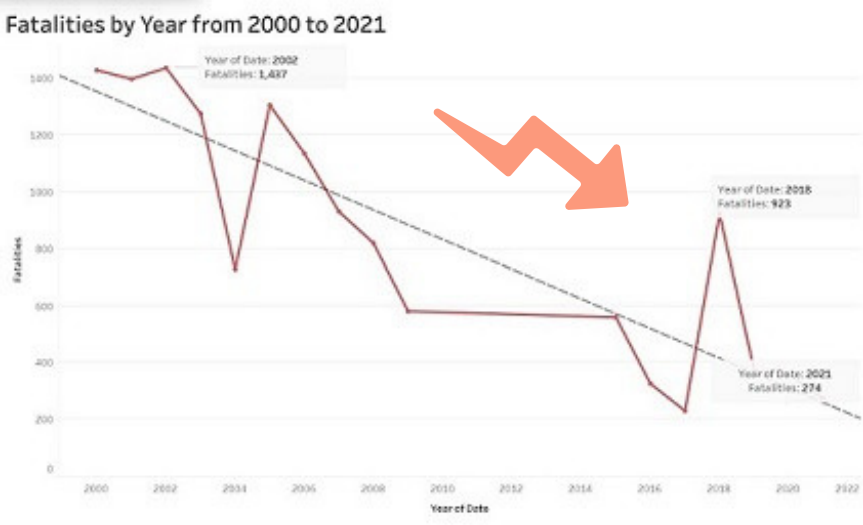

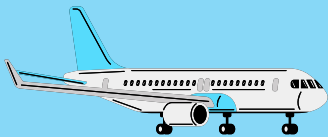

A SAFE TRAVEL

Airline Fatalities recorded from 1912 to 2021.

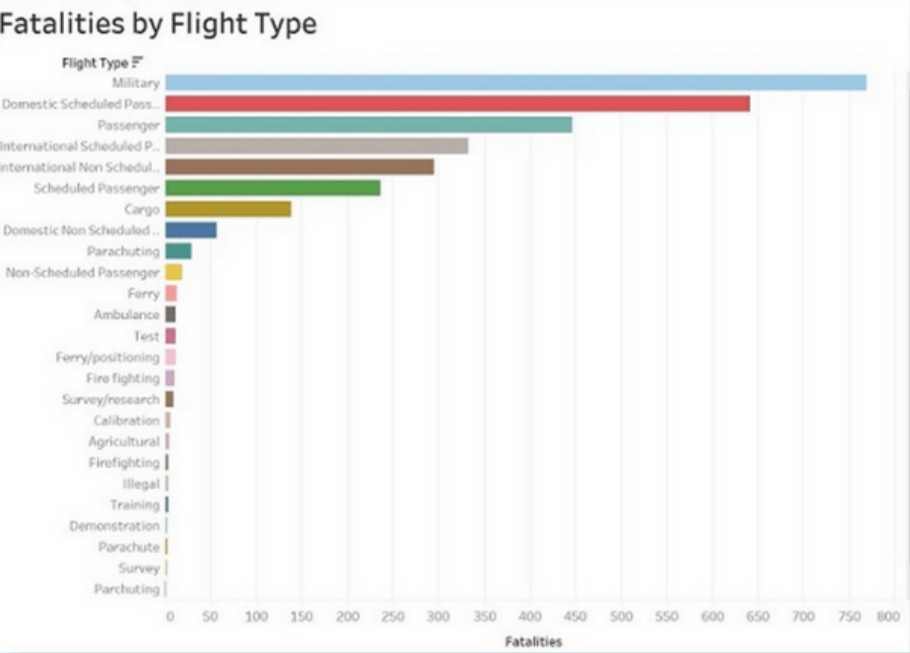

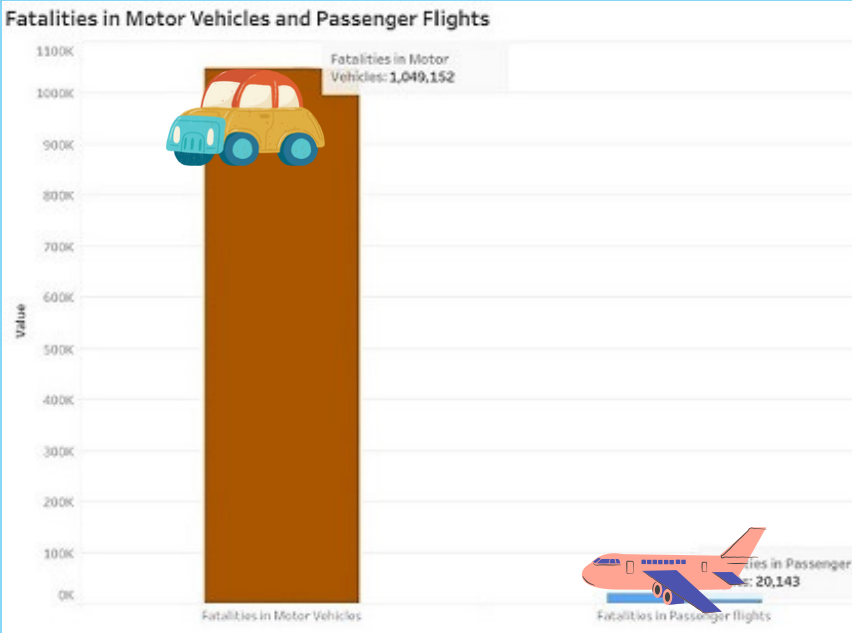

Decrease in the fatalities from 2000 to 2021

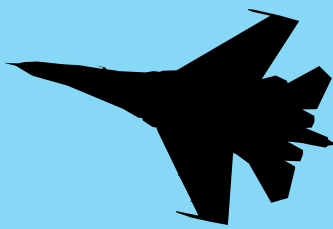

The trend of airline fatalities is decreased when compared to Motor vehicle crashes.

Overall fatalities are more for Motor Vehicles than Airplanes

Maximum number of fatalities seen are in Military Flight Types

The decrease in the fatalities rates in the airline makes the airline travel a safe travel and hence increase in the Domestic Passenger flights seats availability
